Alexandria, VA 22313-1450

Dear Sir:

Applicants express their appreciation to the Examiner for conducting the telephone interview with Applicant's representative on April 19, 2007.

During that interview, it was agreed that paragraph 5 of *Prescott* was not clear in teaching selecting the mode of operation requiring the least amount of energy, but rather teaches effects of a case when the heater current exceeds the laser driving current.

In the event that the Examiner finds remaining impediment to a prompt allowance of this application that may be clarified through a telephone interview, or which may be overcome by an Examiner's Amendment, the Examiner is requested to contact the undersigned attorney.

Dated this 15th day of May, 2007.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Andrew Hansen", written in a cursive style.
